

The Carrot Seed Craft Instructions

Grow a Carrot

You will need:

- Carrot seeds or other seeds of your choice
- Soil or peat pellets
- Small peat pot or container for growing seeds in
- Tray or lid to put under the pot

What to do:

1. If you are using a peat pellet, put it in the pot. If you are using soil, just put the soil in the pot. (You might want to put a tray or lid under the pot to catch water that may drip through.)
2. If you are using a peat pellet, add some water. Watch the peat pellet absorb the water and expand.
3. Push seeds into the soil just until covered. Put the pot in a sunny spot and keep the soil moist. Check your seeds every day to see if they have sprouted.
